The International Consortium On Governmental Financial Management

The Consortium is unique in the financial management community. It was established in 1977 by a distinguished and international group of financial management professionals from government and academia. They recognized the need for the various financial practitioners to engage in dialogue about their perspectives for improving government financial management. ICGFM became the first “umbrella” organization composed of government entities, improving financial management.

OUR MISSION

“We are working globally with governments, organizations, and individuals, the International Consortium on Governmental Financial Management is dedicated to improving financial management, so governments may better serve their citizens, by providing opportunities for professional development and information exchange.”

We do this principally through our semi-annual conferences, monthly forums and the ICGFM Journal.

OUR PROGRAMS

We support our members and others by promoting and supporting professional development activities and information exchange that advance effective governmental financial management principles, standards, and practices. We hold meetings, forums, and conferences that bring together government financial managers from around the world to learn new and innovative approaches to emerging public financial management challenges.
